I called Howard as I said I would but he correctly pointed out that the emails from you should be going directly to Drs. Perera and Raul as they are Center Directors and I have retired. I've cc'ed them here but recommend you get in touch with them directly. In the meantime I will contact Garry as promised. Best Robin

Dear Dr Whyatt,

Thank you so much for taking time today to talk with us about the chlorpyrifos biomarker data. We really hope that it can be shared with us.

As we discussed, it is a very important piece of information that will be central to the approach we are planning on using in our response to the public comments we received including those from Columbia University.

Please contact me at any time should you need any more information or have any questions.

Safe travels this summer and I hope you have a great time. It sounds like an adventure of a lifetime!

Thank you again,

Jeff Dawson

I will have to take by cell from my car so have no access to any of my data and will likely not be able to answer your question but I call in to at least get an idea of the questions you need answered. So I will call in at 2:15 today on number below. Best Robin

Dear Dr Whyatt,

I am working with Anna Lowit on the chlorpyrifos risk assessment. I was copied on the email chain earlier today.

We were all wondering if you had time, perhaps today, to participate in a phone call with us given everybody's schedules over the next couple of weeks. It sounds like you are going on a big camping adventure and Anna is also going to be on vacation as well.

I was thinking about 2:15 today for about 30 minutes or so.

Here is the call in information

[REDACTED]

[REDACTED]

If you are not available, could you perhaps suggest some alternate times/dates?

Thanks so much, we really appreciate you spending time to help us.

Jeff Dawson
